

USM

# USM Haller Soft Panel

Playfully change appearances and functions thanks to magnets.

Add warm accents in the metallic structure.

Effortlessly flip up or down.

Effortlessly slide smaller panels sideways.

Create visual effects with patterns and colours.

# USM Haller Soft Panel

# A soft touch to the classic

The new USM Haller Soft Panel adds a soft and playful touch to the USM product range. The textile panels come with four magnets and can be easily clicked into the tubular structure of the modular furniture system – no assembly or additional fixtures required. It's just as easy to fold them up or down to open and flip into the next compartment. And of course you can turn things round at any time or position them somewhere else in the furniture.

Opening, closing, sliding and repositioning is effortless. Magnetism creates a completely new experience: playful, soft, and easy.

Ready to retrofit

## Playful

The furniture's aesthetics and functionality are transformed in the blink of an eye, adapting to your mood or changing requirements. Patterns and colours can be combined like pieces of a jigsaw puzzle to form a cohesive whole or an eclectic mix. Flip – one moment it's bright orange – flap – now your furniture is transformed into an elegant red with a vertical pattern. Every flip brings a new change.

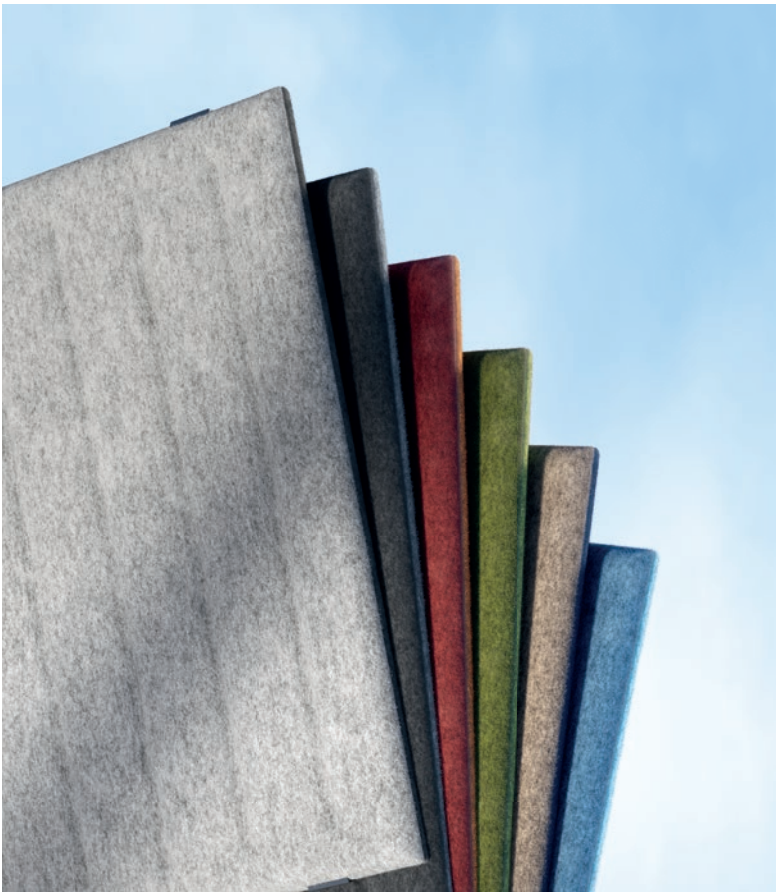

## Soft

The USM Haller Soft Panel is made of high-quality synthetic fibre, with 40% recycled marine plastic. Lightweight, stable and renowned USM durability. Soft to the touch and a warm aesthetic – providing a surprising contrast in the metallic world of the classic design. Another special feature: the panels reduce noise and improve the room acoustics. This is typical USM: design, functionality and sustainability in symbiosis.

## Easy

The lightweight panels are easy to attach and move without any assembly or additional equipment. This is why they are ideal for giving existing furniture a fresh twist.

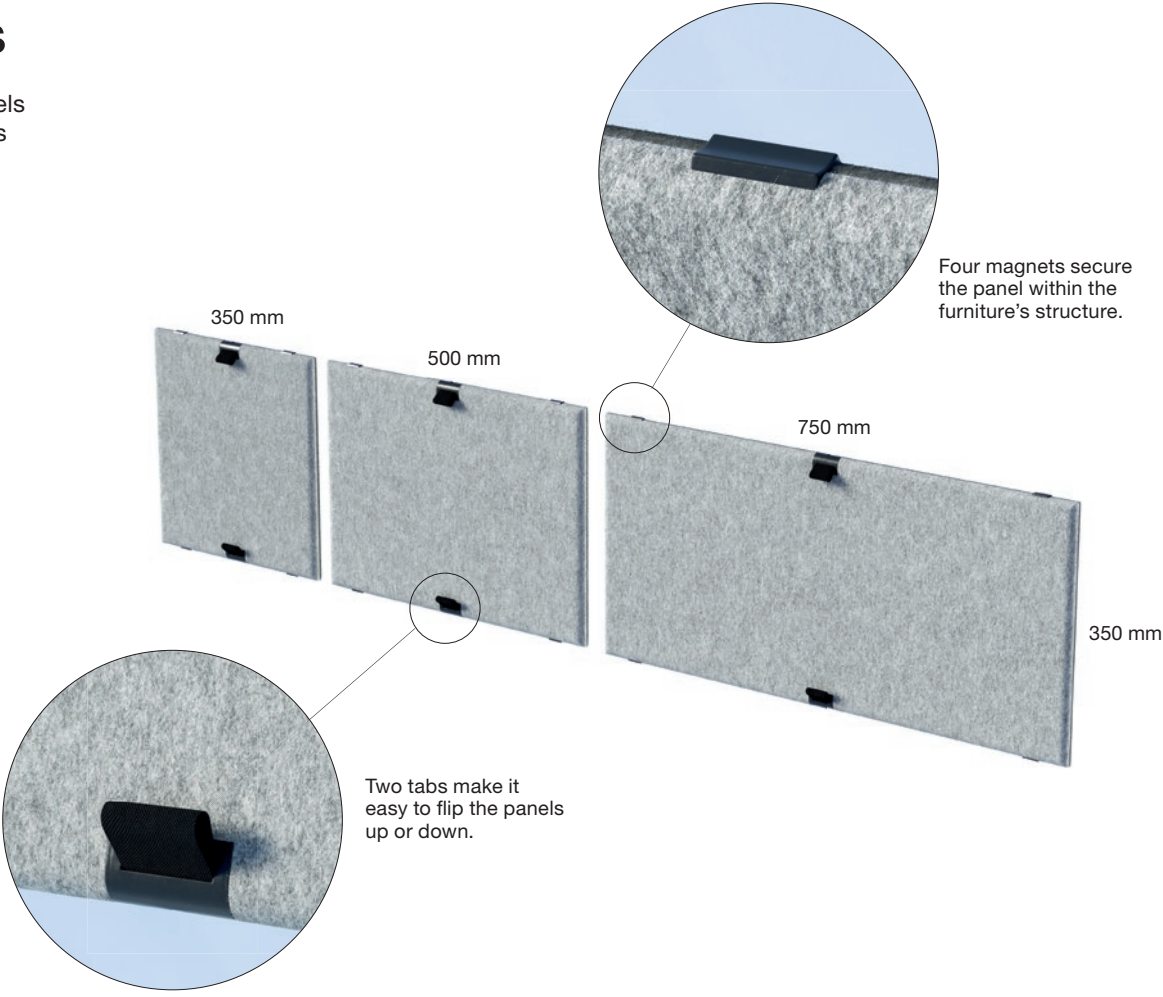

## Dimensions

The USM Haller Soft Panels are available in three sizes to fit the most common USM Haller dimensions.

750 × 350 mm  
500 × 350 mm  
350 × 350 mm

Smaller panels can be slid horizontally in larger modules.

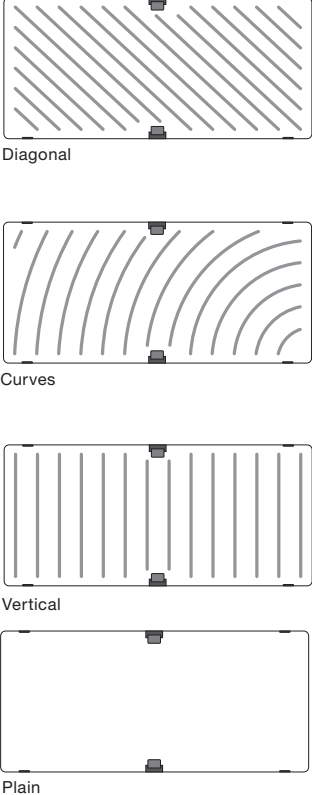

## Patterns and colours

There are three patterns to choose from: diagonal, curved and vertical grooves.

The Mono Panels are designed with the same pattern on both sides (either diagonal or curved grooves) and in a single colour.

Duo Panels have vertical grooves on one side, are plain on the back and available in various colour combinations.
